

Fiber Optic Cable

Mind's Eye Companies Worldwide Inc. has been in business in Georgia since 1990. In 2012, they met the stringent requirements for ISO 9001–2008 certification. This certification is for product design processes, manufacturing procedures and customer service.

MEC specializes in engineering, manufacturing and distribution of fiber optic products. It's core markets are automation, factory drives, medical and sensor industries worldwide. The company makes and markets standard, custom and OEM fiber cable assemblies that utilize plastic and plastic-clad glass optical core fiber, bulk fiber cable, connectors, tools and test equipment. They're a leader in providing top quality educational laser and fiber optic products, which incorporate in-depth safety mechanisms.

The MEC prototyping shop can build prototypes and fixtures in the house with its state-of-the-art equipment. Customers choose for my wide variety of stock fiber and connectors to fabricate custom products. Among these products are the unjacketed POF fibers (used in the majority of lighting projects), jacketed POF fibers (specified in many data communications projects) and standard POF assemblies such as those for Sercos I and II, Profibus and other industrial, audio and networking technical standards.
